

SMALL, BUT
GROWING
COMPANIES

**REGAIN YOUR ENTREPRENEURSHIP
WITH**

Being an entrepreneur used to be fun!

In the early days, when you were transforming your idea into your company, after a full day of hard work you were not tired! NO! You had the feeling you only gained energy from all the great things you were busy with.

But nowadays things are different.

You realize you should be shaping the company's phase after next but are too busy with day-to-day business management stuff. And sometimes you wonder...why was starting this company such a good idea in the first place?

Your Situation is not Uncommon

We know that owners of 'Growing Companies' often reach a point they feel stuck and don't know how to proceed towards the next phase. We know that a lot of founders feel overwhelmed when they look at their agenda filled with all kind of management tasks. We know it is easy to get distracted and lose overview. Your company has grown, and you notice **there is something wrong, but you don't know what.**

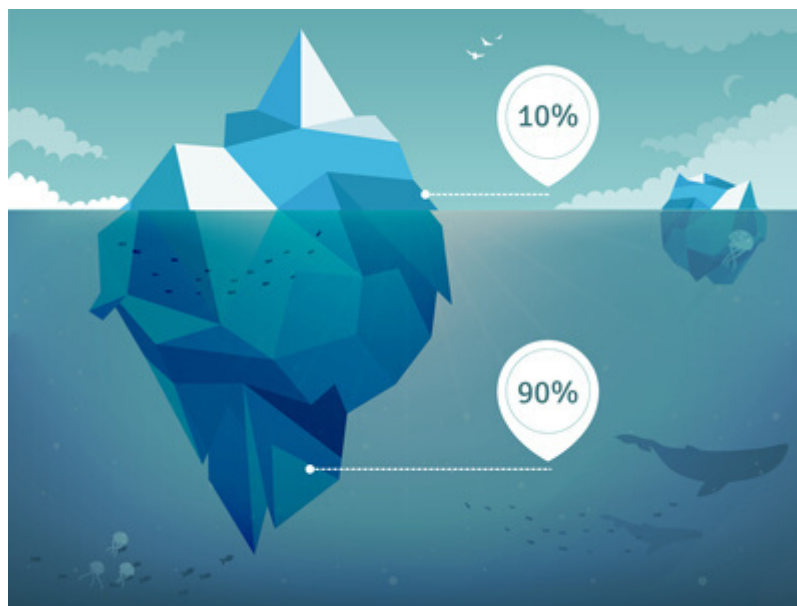

**What would you say if I tell you this
can be solved with a systemic
perspective?**

WE HAVE YOUR BACK!

OF WOOD helps you to get the overview again, knowing what is going on, knowing what is important, knowing what to do next.

Our unique systemic approach is focused, effective and solution-oriented. It takes relatively little time to achieve the desired results and perceived as very enjoyable.

Systemic Work means Learning through Experience, discovering what lies beneath the question. This way, whatever is going on beneath the surface -often times tangible but not nameable- becomes available, bringing the solution quickly within reach in a sustainable way.

'Tell me, and I will forget. Show me, and I may remember. Involve me, and I will understand.'

– Confucius

BACK TO BEING AN ENTREPRENEUR

OF Wood's Growing Companies program helps founders / owners to appropriately take up their role and position.

It provides valuable insight in the needs of the company.

FOR WHO

It allows you to understand organization- and team dynamics, and appropriately handle them.

And, foremost, for you personally it means that you know exactly what you can do to figure out the next steps yourself!
